Elixora

TECHNOLOGY STACK (PROPOSED)

ELIXORA

FEATURES PROPOSED

BASIC

1. Medicine Scheduling

- Add pill name, dosage, time, and frequency with a simple form.
- Supports flexible schedules (daily, weekly, custom).
- Ensures performers always know what and when to take.

2. Reminder Notifications

- Instant browser alerts or email reminders at set times.
- Prevents missed doses with timely nudges.
- Customizable reminder intervals.

3. Dose Logging

- Tracks taken vs. missed doses in real-time.
- Builds a clear history of adherence.
- Helps performers stay accountable.

4. Dashboard (Upcoming & Past Reminders)

- Displays all scheduled and completed doses.
- Easy navigation between today, past, and upcoming tasks.
- Clear status indicators (taken, pending, missed).

5. Edit/Delete Schedules

- Modify medicine details anytime.
- Remove outdated or incorrect entries.
- Keeps records accurate and clutter-free.

6. Data Visualization

- Graphs show trends in adherence over time.
- Highlights missed doses for pattern recognition.
- Provides visual insights into performer wellness.

ELIXORA

FEATURES PROPOSED

Advance

Discover the Magic

Powerful Reminders
Set precise schedules for any elixir. Receive timely browser or email alerts so you never miss a dose.

Simple Logging
Effortlessly track taken vs. missed doses with a single click, maintaining a perfect record.

Wellness Dashboard
Visualize your progress with beautiful charts showing adherence rates, trends, and scores over time.

Mystic Predictions
Our advanced AI predicts when a dose might be forgotten and sends proactive nudges to keep you on track.

Calendar Sync
Automatically sync your Grimoire to the Great Sky Calendar (Google Calendar) for a unified view.

Natural Language
Ask questions in plain English, like "When is my next dose?" and get instant answers from the Mystic.

1. AI-Powered Adherence Prediction (Mystic Fortune Teller)

- Learns user habits (e.g., commonly missed night doses).
- Sends proactive “extra reminders” at high-risk times.
- Improves consistency with predictive nudges.

2. AI Chatbot Health Assistant (Mystic)

- Natural language queries like “What do I take today?”
- Quick answers on missed doses or upcoming schedules.
- Acts as a 24/7 personal wellness assistant.

3. Google Calendar Integration (Great Sky Calendar)

- Syncs medication schedules directly into Google Calendar
- Updates events if doses are rescheduled or missed.
- Ensures reminders are accessible across all devices.

ELIXORA

Description of website

Elixora - An Alchemist is a smart medication management platform designed to help users stay on top of their health effortlessly. It combines intuitive scheduling, real-time reminders, and AI-powered insights to ensure you never miss a dose.

With Elixor, users can:

- **Easily schedule medicines by entering pill name, dosage, timing, and frequency, supporting daily, weekly, or custom routines.**
- **Receive timely reminders via browser notifications or email to prevent missed doses.**
- **Track adherence with a clear log of taken and missed medications, helping users stay accountable.**
- **Visualize trends through interactive dashboards and graphs, highlighting patterns in adherence and missed doses.**
- **Edit or delete schedules anytime to maintain accurate records without clutter.**

The platform also offers advanced AI features:

- **Predictive adherence alerts anticipate missed doses and send extra reminders during high-risk times.**
- **AI Health Assistant (“Mystic”) answers questions like “What do I take today?” and provides guidance on upcoming missed doses.**
- **Google Calendar integration syncs your medication schedule across devices, keeping your health on track whenever you are.**
